Version control, git, and GitHub

Carlos Valencia-Hernández

Outline

- Version control, git, GitHub
- Frequently used terms
- GitHub in Mac/Windows
- Integration with R?

GitHub

git

**VERSION
CONTROL**

What is git?  git

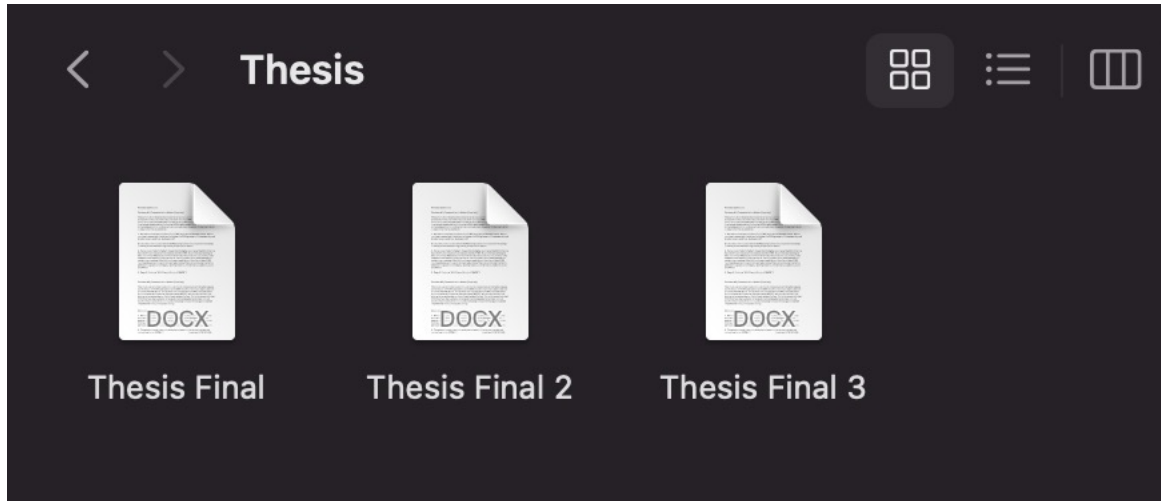

“A free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency”

Version control

- Record changes over time
- Management of changes to documents, programs, web sites, or any other information
- Snapshots of every change you make
- Revert changes if needed

Track changes in MS Word

```
1 # Big Data
2
3 A term you may have heard of before this course is "Big Data" - there have always been large datasets, but it seems like
  lately, this has become a buzzword in data science. But what does it mean?
4
5 ### What is big data?
6
7 We talked a little about big data in the very first lecture of this course. As the name suggests, big data are very large data
  sets. We previously discussed three qualities that are commonly attributed to big data sets: Volume, Velocity, Variety. From
  these three adjectives, we can see that big data involves large data sets of diverse data types that are being generated very

Snapshots, not differences

- Other version control software
- Git (snapshots)

Frequently used terms

- **Repository**

A folder that contains a project. (Although you can have multiple projects inside a repository)

- **Commit**

Each snapshot or version of the project (locally)

- **Branch**

A sequence of commits that has an order. (A *Master* branch)

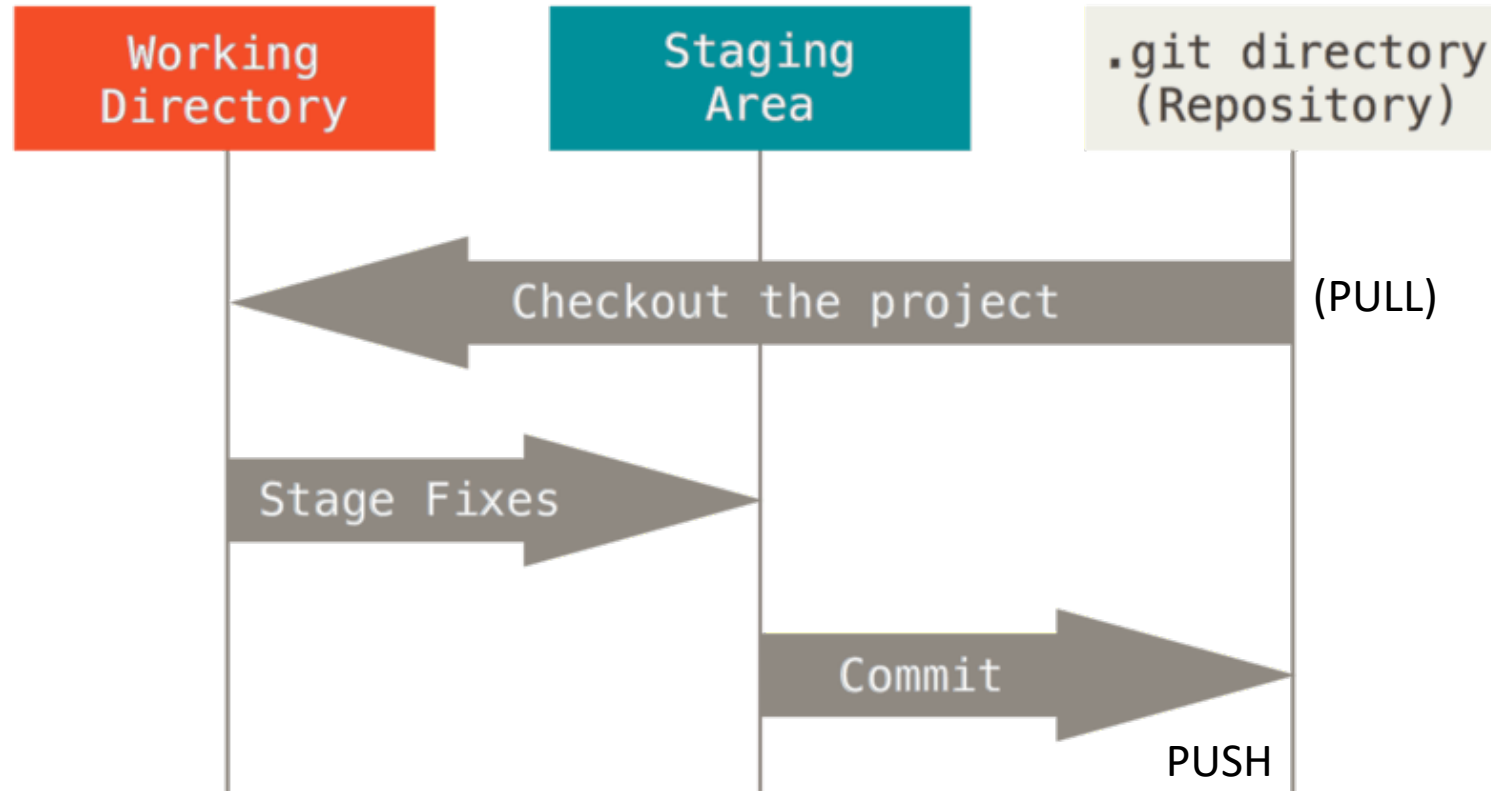

- **Push**

- **Pull**

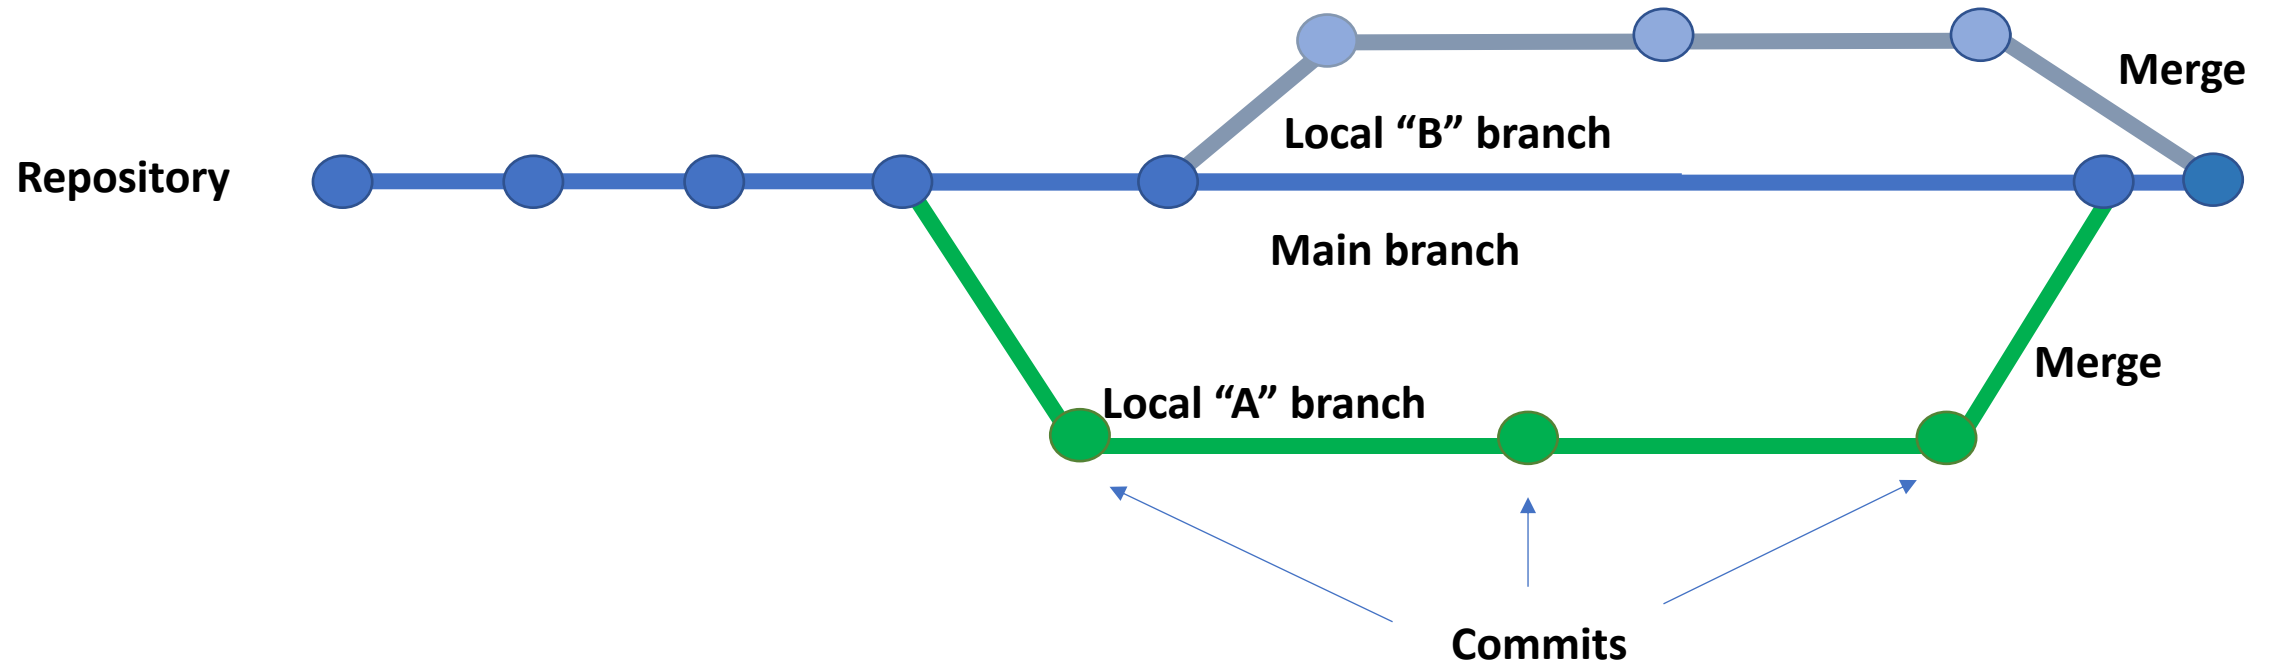

Main sections of a Git project

Branches

- Files with two copies that are *simultaneous*

Conflict

- Merging branches with competing commits

This branch has conflicts that must be resolved

[Use the command line](#) to resolve conflicts before continuing.

What is Git(Hub?)

The GitHub

- Open source program for version control
- Multiple programming languages (**Also Stata**)

The GitHub

- A collaboration platform
- Showcase
- Repository

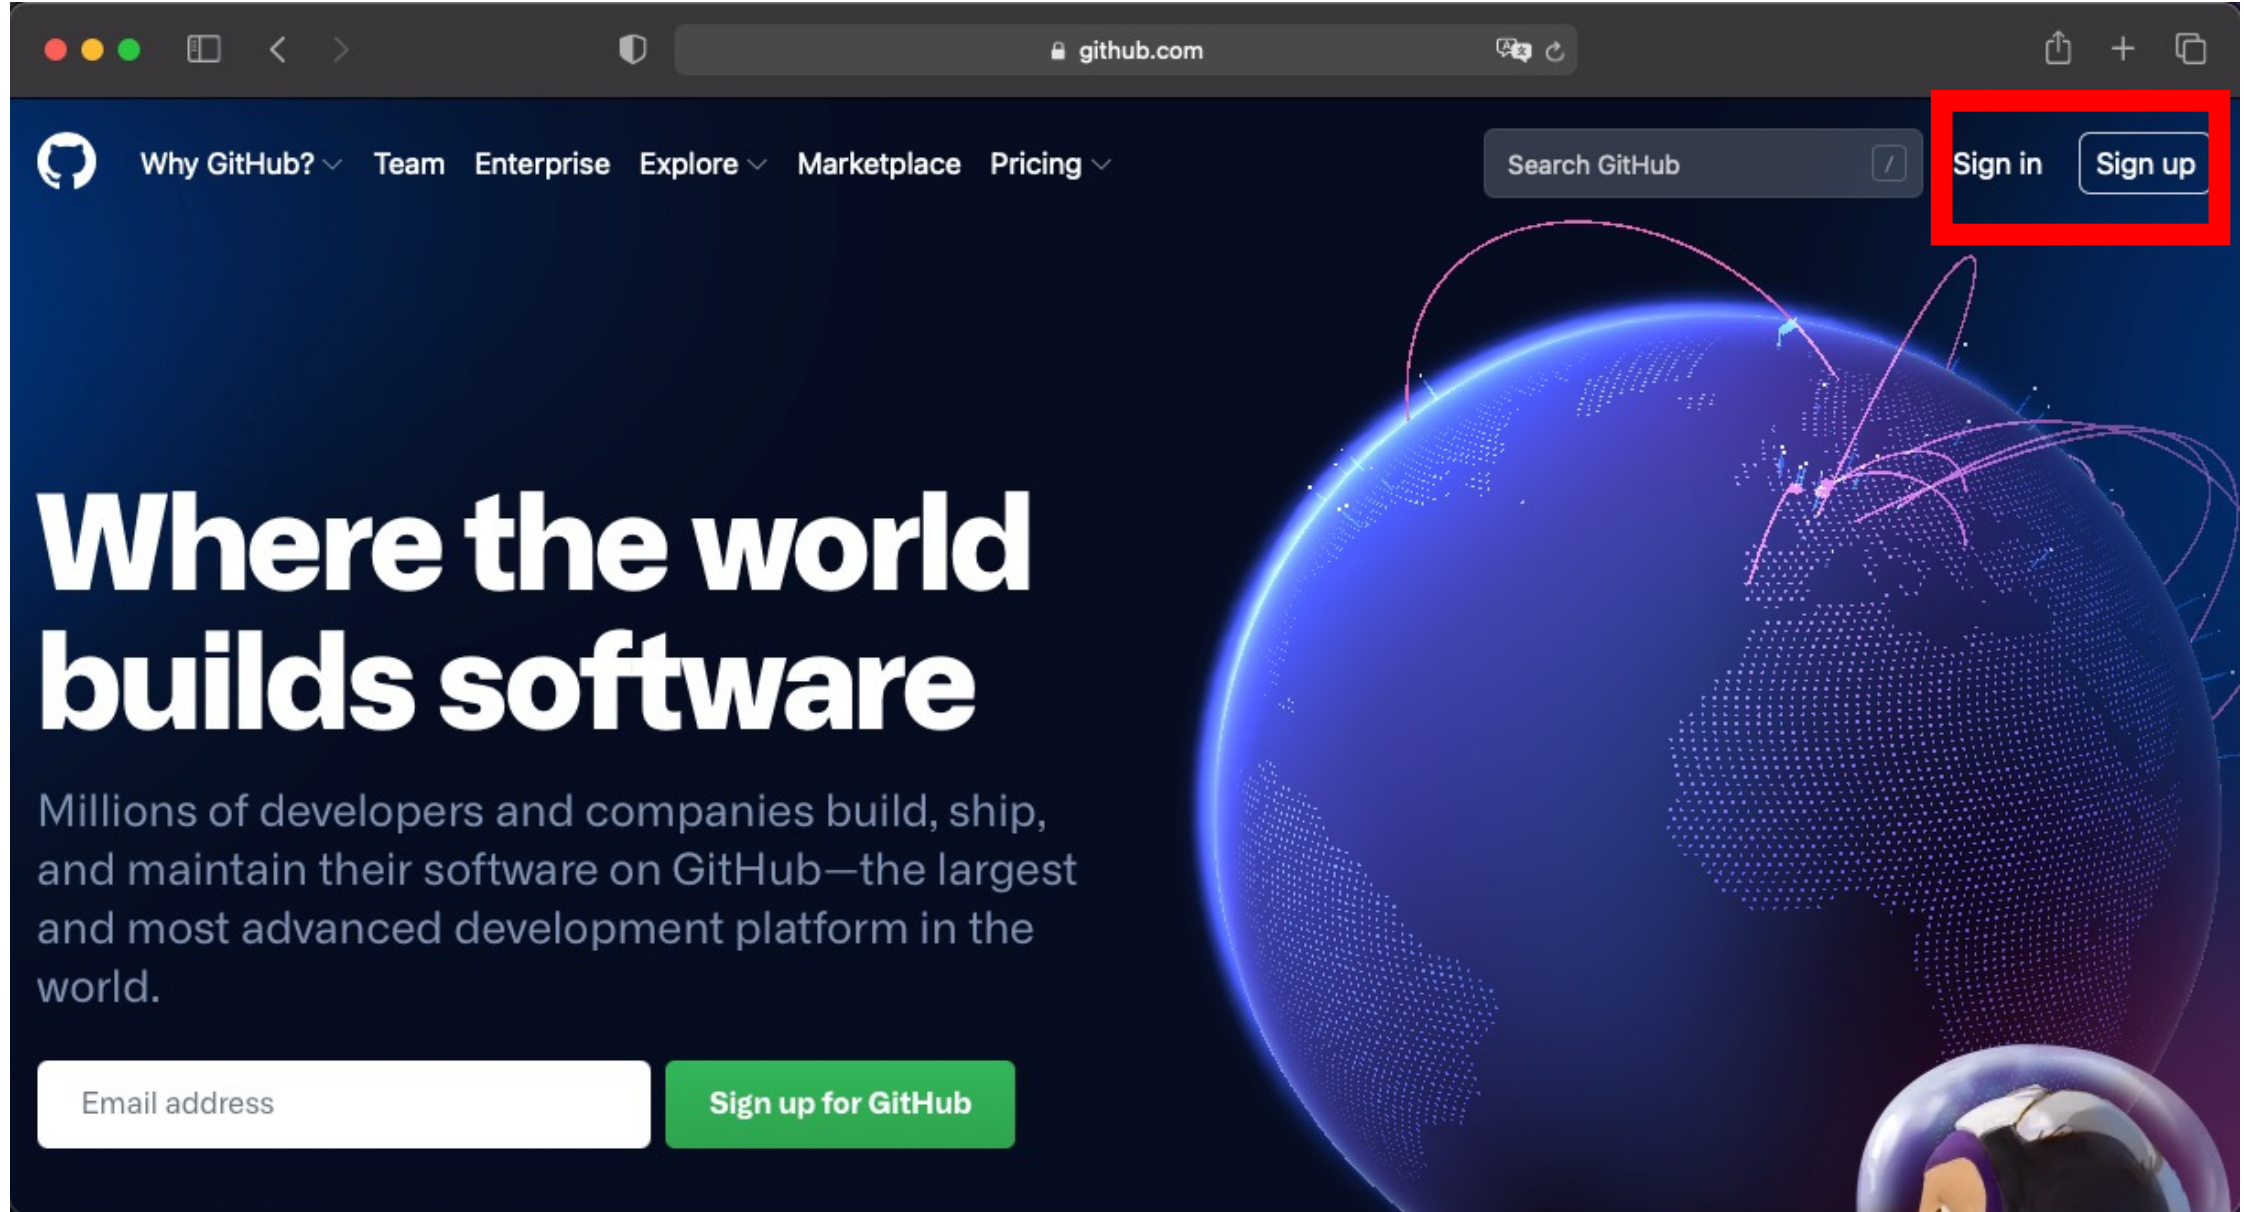

Most popular languages on GitHub

Place	Language	%
1	JavaScript	18.756% (+0.053%)
2	Python	16.628% (+0.390%)
3	Java	11.680% (+0.742%)
4	Go	7.829% (-1.176%)
5	Ruby	7.588% (+0.776%)
6	C++	6.985% (-0.439%)
7	TypeScript	6.604% (-0.164%)
8	PHP	5.081% (-0.046%)
9	C#	3.614% (-0.221%)
10	C	3.253% (+0.072%)
33	R	

Growing popularity of Stata in GitHub

Working with a team?

GitHub is built for collaboration. Set up an organization to improve the way your team works together, and get access to more features.

Create an organization

All activity

Introduce yourself

The easiest way to introduce yourself on GitHub is by creating a README in a repository about you! You can start here:

Carvalenc / README.md

```
1 - 🙋 Hi, I'm @Carvalenc
2 - 🤖 I'm interested in ...
3 - 🌱 I'm currently learning ...
4 - 💖 I'm looking to collaborate on ...
5 - 📫 How to reach me ...
6
```

MAC terminal

```
MacBook-Pro-de-Carlos:githubrepositories carvalenc$ MacBook-Pro-de-Carlos:Documents carvale  
nc$ cd Codelearning  
-bash: MacBook-Pro-de-Carlos:Documents: command not found  
MacBook-Pro-de-Carlos:githubrepositories carvalenc$ MacBook-Pro-de-Carlos:Codelearning carv  
alenc$ cd githubrepositories  
-bash: MacBook-Pro-de-Carlos:Codelearning: command not found  
MacBook-Pro-de-Carlos:githubrepositories carvalenc$ MacBook-Pro-de-Carlos:githubrepositorie  
s carvalenc$  
-bash: MacBook-Pro-de-Carlos:githubrepositories: command not found  
MacBook-Pro-de-Carlos:githubrepositories carvalenc$
```

Windows on a UCL computer

Clone the repository

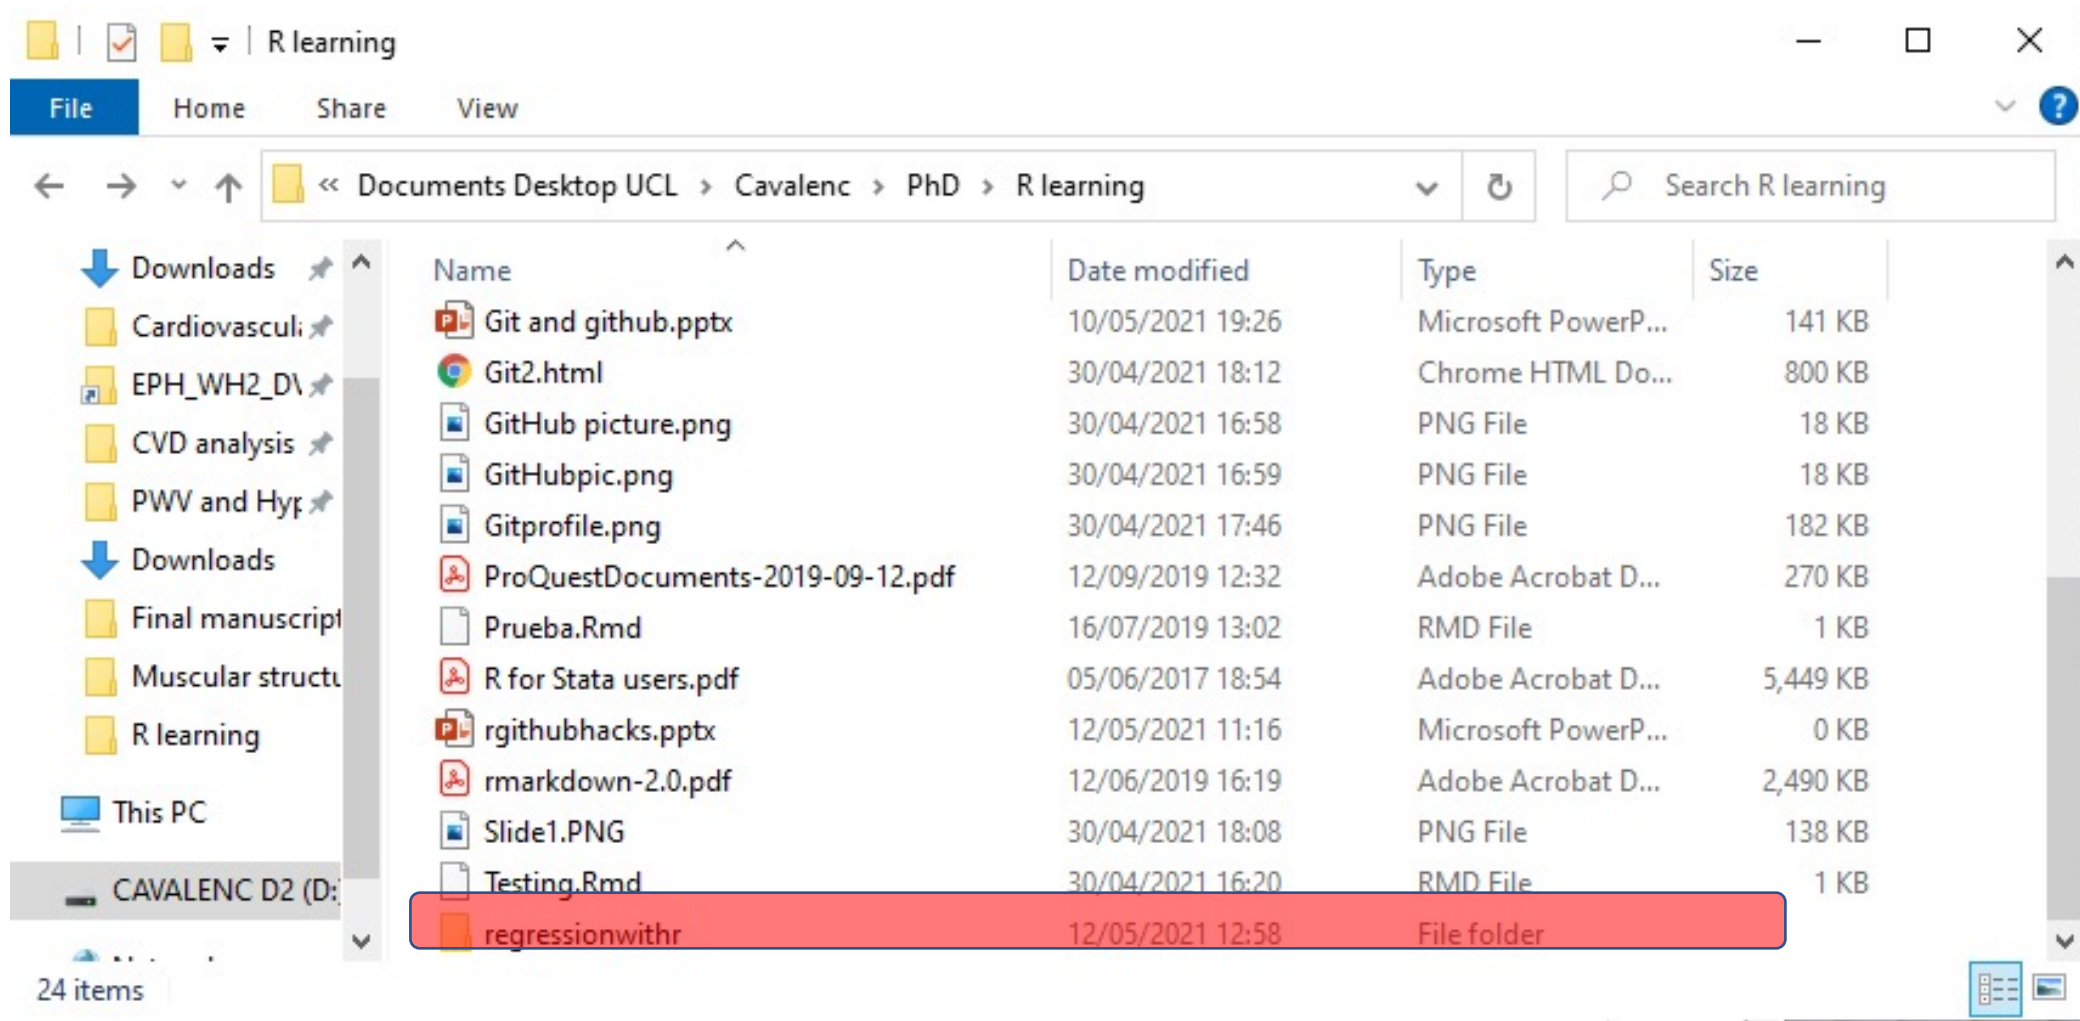

The screenshot shows the GitHub interface for the repository `Carvalenc/regressionwithr`. The repository is private and has 1 branch and 0 tags. The commit history shows an initial commit by Carvalenc 1 hour ago, containing `.gitignore`, `LICENSE`, and `README.md`. The `README.md` file is titled `regressionwithr` and describes it as "Text and script in R studio for the exercises of the book 'Linear Regression with R, from Martin Sheather'". The repository is licensed under GPL-3.0.

A GitHub Login modal is overlaid on the right side of the page, showing fields for "Username or email" and "Password", and buttons for "Login" and "Cancel". Below the login fields, it says "Don't have an account? Sign up" and "Forgot your password?".

A terminal window is overlaid at the bottom, showing the command to clone the repository:

```
Select MINGW64:/d/Documents/Desktop/UCL/Carvalenc/PhD/R/learning
rmj1ava@CS00035589 MINGW64 /d/Documents/Desktop/UCL/Carvalenc/PhD/R/learning
$ git clone https://github.com/Carvalenc/regressionwithr
Cloning into 'regressionwithr'...
```

Now we can see the cloned repository
